| Project Name  | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks | 10 Marks                                                                          |

### 1. Purpose of Document

This document briefly explains the test coverage and open issues of the Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer project at the time of the User Acceptance Testing (UAT). It records the defects found and the test case results.

### 2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level and how they were resolved.

| Resolution     | Severity 1 | Severity 2 | Severity 3 | Severity 4 | Subtotal |
|----------------|------------|------------|------------|------------|----------|
| By Design      | 0          | 0          | 0          | 0          | 0        |
| Duplicate      | 0          | 0          | 0          | 0          | 0        |
| External       | 0          | 0          | 0          | 0          | 0        |
| Fixed          | 0          | 0          | 0          | 0          | 0        |
| Not Reproduced | 0          | 0          | 0          | 0          | 0        |
| Skipped        | 0          | 0          | 0          | 0          | 0        |
| Won't Fix      | 0          | 0          | 0          | 0          | 0        |
| <b>Totals</b>  | <b>0</b>   | <b>0</b>   | <b>0</b>   | <b>0</b>   | <b>0</b> |

### 3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and are untested.

| Section                          | Total Cases | Not Tested | Fail     | Pass      |
|----------------------------------|-------------|------------|----------|-----------|
| Flow Creation                    | 3           | 0          | 0        | 3         |
| Flow Assignment                  | 2           | 0          | 0        | 2         |
| Service Catalog Order & Approval | 4           | 0          | 0        | 4         |
| Catalog Task Verification        | 3           | 0          | 0        | 3         |
| <b>Total</b>                     | <b>12</b>   | <b>0</b>   | <b>0</b> | <b>12</b> |

### 4. Detailed UAT Test Cases

| Test ID | Scenario                                                                             | Expected Result                                             | Actual Result             | Status |
|---------|--------------------------------------------------------------------------------------|-------------------------------------------------------------|---------------------------|--------|
| TC-01   | Create flow "Standard laptop task" (Global, Run as System User)                      | Flow is created and opens in Flow Designer                  | Flow created successfully | Pass   |
| TC-02   | Add Service Catalog trigger and Create Catalog Task action                           | Trigger and action appear in the flow                       | Trigger and action added  | Pass   |
| TC-03   | Set short description, description, Assignment group and Approval; save and activate | Flow is saved and status is Active                          | Flow active               | Pass   |
| TC-04   | Open Maintain Items > Standard Laptop > Process engine and add the flow              | Flow "Standard laptop task" is listed in the Process engine | Flow added and item saved | Pass   |
| TC-05   | Remove other automations from the Process engine                                     | Only the new flow remains attached                          | Only the flow is attached | Pass   |
| TC-06   | Open Service Catalog > Hardware > Standard Laptop                                    | Standard Laptop item opens with Order Now button            | Item displayed            | Pass   |
| TC-07   | Click Order Now to place the order                                                   | Order is placed and request number is shown                 | Request number generated  | Pass   |
| TC-08   | Open the request and approve it from the Approvers section                           | Request is approved                                         | Request approved          | Pass   |
| TC-09   | Open the Requested Item after approval                                               | Requested Item shows the Catalog Tasks section              | Section displayed         | Pass   |
| TC-10   | Check that a catalog task is created automatically                                   | One catalog task exists under the Requested Item            | Task created by the flow  | Pass   |
| TC-11   | Verify the task short description                                                    | Short description is "Laptop need to Configured"            | Short description matches | Pass   |
| TC-12   | Verify the task assignment group                                                     | Assignment group is Hardware                                | Assigned to Hardware      | Pass   |
