Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Empathy Map – Employee requesting a standard laptop (IT procurement)

Says: "When will my laptop be ready?"; "Why is it taking so long to configure?"

Thinks: "The process should be automatic once my request is approved."; "I do not know who is working on my request."

Does: Orders a Standard Laptop from Service Catalog > Hardware, checks the request status and follows up with the IT team.

Feels: Frustrated by delays, uncertain about the status and worried about losing working time.

Pains: Manual hand-offs, configuration step overlooked, long waiting time, no clear ownership of the task.

Gains: Laptop configured promptly after approval, automatic task assignment to the Hardware team, visible task status and less manual follow-up.
